NORWEST
CONTRACTING AND RAIL

Capability **STATEMENT**

100% Pilbara TLO Indigenous owned business.

Capability STATEMENT

WHO WE ARE

NWCR is a 100% Ngarluma TO owned business committed to delivering safe, efficient and cost-effective contracting services while supporting the local communities in which we operate.

We have been in operation for over a decade and proudly provide complete and comprehensive solutions in a diverse range of areas such as Plant Hire, Construction, Electrical, Mechanical, Maintenance, Civil, Rail and Modular Infrastructure.

Locations:

We currently operate across Perth and the Pilbara region with services available for even your most remote projects throughout WA.

NWCR is dedicated to supporting our local communities and promoting opportunities for sustainable Indigenous employment.

Ngarluma Traditional Landowner

OUR STORY

In 2012, a remarkable and determined Ngarluma woman by the name of Melanie Tavo (nee Lockyer – Hicks) launched Norwest Civil and Rail through a BHP pilot program for local Indigenous businesses.

Her vision for Norwest was crystal clear from the start: to support her growing family and to develop opportunities for sustainable employment and independence underpinned by a culture of taking pride in hard work and unfailing integrity. Never shy of a challenge, Melanie's drive and determination have seen the company develop and expand into the multi-million-dollar operation it is today. It bears a new name commensurate with the vastly broader range of skills, services and equipment it now offers to best service its equally broad cross section of clients.

The company is experiencing growth and remains an independent 100% Pilbara TLO Indigenous owned company despite numerous offers to JV with industry partners over the years.

On the 25th August 2021, Norwest Contracting and Rail became Melanie's legacy for she left this physical world after being promoted to receive her Angel Wings. We want you to know that Melanie's vision for NWCR, for the industry the company serves, for the people it employs and for her two boys, stands truer now than ever before.

The responsibility and commitment of those chosen to continue Melanie's legacy is deep and the Norwest Team is both proud and excited for our future.

Capabilities
OVERVIEW

CONTRACTING SERVICES

- Fencing and line marking
- Corrosion control, sand blasting & industrial painting
- Logistics & equipment transport, hot shots
- Traffic management & trained spotters
- Engineering, fabrication & site remediation
- Labour hire & skilled operators
- Armco railing, safety barriers supply & installation
- Road sweeping

ELECTRICAL SERVICES

We operate under our electrical license EC 15479 supported by an in family electrical engineer.

- Electrical tagging, Testing and Repairs
- Power Supply and Generation
- Process Control Systems
- Lighting
- RFID Maintenance & Replacement
- Instrumentation, control, commissioning
- Underground and above ground cabling
- HV underground cabling and Maintenance Inspections
- LV cabling to domestic, commercial and industrial building
- Solar and renewable projects for Commercial and domestic

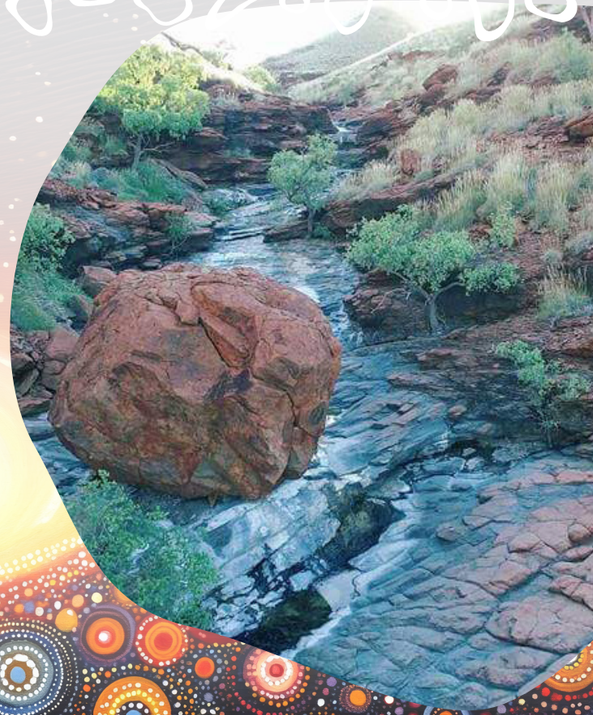

EQUIPMENT PROFILE

- Mine Spec Light Vehicles
- Excavators (wheeled, tracked, Hi-Rail)
- Trucks (flat top, tipper, semi etc)
- Loaders & Graders
- Backhoe & skid steer
- Reach Stacker
- Water carts & Vacuum trucks
- Welding Units
- Rollers
- Dozers & Moxy dump trucks
- Concrete pump trucks
- EWP’s

VEGETATION & PEST MANAGEMENT

- Land clearing
- Vegetation & weed control
- Mine Spec Light Vehicle Boom Spraying
- Pest management business registration #2704

CIVIL & CONSTRUCTION

Our civil & construction division provides reliable, high-quality services across Perth and regional WA. With strong local knowledge, a skilled Indigenous workforce, and a commitment to safety, we support mining and infrastructure projects from site preparation through to construction and remediation.

Our capabilities include:

- Civil earthworks and haulage
- Drainage and formation works
- Concreting
- Construction and maintenance of roads
- Signage installation
- Level crossing upgrades & compliance
- Bridge services & remediation
- Supply & Install ARMCO Railing
- Construction of noise barriers and retaining walls
- Pre-purchase reports
- Estimating and Cost planning

Each project is delivered with a focus on quality, efficiency, safety and creating meaningful employment opportunities within the Pilbara.

RAIL SERVICES

Our rail division delivers innovative solutions across the rail industry, providing engineering expertise, maintenance and project execution that enhances safety, efficiency and reliability.

Our capabilities include:

- Rail Welding
- Rail Construction – rail crossing upgrades, walkways & landing pads
- Signal Technicians
- Undercutting & bog hole removal
- Experienced hi-rail operators
- Track Protection Officers (Yard & Mainline)
- Traffic management
- Asset Health reports & life cycle strategies
- Ballast supply and delivery (ballast cleaning)
- Derailment response
- Slab track renewal
- Scrap rail clean-up & removal
- Ore car clean outs
- Track Maintenance, re-rail, de-stressing, rail structure maintenance & inspection including culverts

MODULAR INFRASTRUCTURE

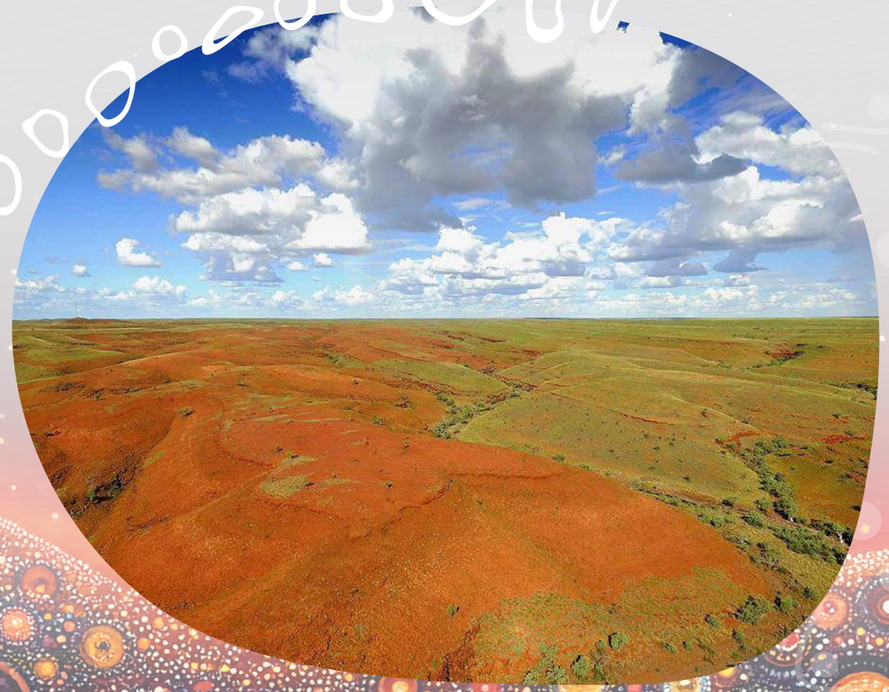

Pioneers in EPS-FR modular construction. From compact granny flats and office pods to multi-resort accommodations and warehouse builds, our modular solutions are scalable, compliant, and built to perform. We offer a smarter, faster and more ethical way to build.

- **Residential Builds** - From single homes to townhouses, our modular system speeds up construction while delivering premium energy efficiency and durability.
- **Commercial Projects** – Fast-track your next retail, office, or industrial project with our scalable panel systems designed to meet strict compliance standards.
- **Collaboration & Integrated Approach** – Whether for private, community, or commercial use, our systems flex to your needs.

From concept to completion, we ensure collaborative planning tailored to your needs, site conditions and compliance requirements. We guarantee precision-engineered panels manufactured locally using high-performance materials for strength and thermal efficiency. Panels are delivered and assembled quickly by our trained team, cutting build times by up to 50%.

Build smarter, build faster, build better.

MECHANICAL & ENGINEERING

Our mechanical services division provides specialised engineering, asset maintenance and conveyor system solutions across the Pilbara and regional WA. With experienced technicians, strong safety standards and the ability to support remote operations, we help mining, rail and industrial clients maximise equipment performance and extend the life of critical assets.

Our capabilities include:

- Asset condition assessment
- Engineering improvement solutions
- Pre-engineered product supply and support
- Reverse engineering of components and equipment
- Service life enhancement and asset optimisation
- Rubber lining turnkey projects
- Surface treatment services
- Pulley manufacturing and lagging
- Industrial coating and painting works
- Belt splice kit manufacturing
- Supply for conveyor belt projects
- Pre-shut/Wash downs

Through quality workmanship and technical expertise, we deliver reliable mechanical and engineering solutions suited to our clients' needs.

Our PROJECTS

RAIL BRIDGE UPGRADES

RIO TINTO

The scope involved replacing the existing vehicle driving surface by removing the existing plastic grating and replacing it with a new and approved True grid system, installation of new painted steel kerb sections along the length of bridge to reduce the risk of vehicle impact on pedestrian handrail. This upgrade along with a speed restriction of 10km/h (from 20km/h) allows for 6400kg GVM vehicle crossing. The installation of approach kerbing at the bridge abutment access points to prevent vehicle access to the East Walkway.

R.O.W REMEDIATION – 100% INDIGENOUS CREW

CHEVRON

This project involved vegetation clearing and repairing the drive surface of the ROW at the Domgas Pipeway, with special consideration of adjacent cultural heritage areas. The works were completed by a 100% Indigenous crew.

PEDESTRIAN WALKWAY UPGRADES

RIO TINTO

NWCR delivered walkway upgrades at Rio Tinto Rail Yard, including site clearing and grubbing, bulk earthworks to construct subgrade, installation of 3 × 12 m drainage CSP culverts, and erosion control to batters using geofabric and rock protection. Works included installation of a reinforced 32 MPa concrete walkway system with precast edge beams, edge panels, and centre panels, along with handrails, wire fencing, maze barriers, and safety signage at rail crossings. All works were undertaken under track access constraints with lookout protection, including a variation adding 42 m of additional footpath to the site office.

THE OASIS 12 UNITS

GOLDEN PONDS

The 12-unit development at ***Golden Ponds*** involved the construction of modern, two-bedroom holiday cabin designed to enhance the site's short-stay and tourism accommodation. These units were built to a high-end finish, featuring fully equipped kitchens, spacious lounge and dining areas in our specialised panel system. A key aspect of this project was the inclusion of ***ACROD-compliant facilities*** in specific units, ensuring the development met modern accessibility standards. The build was executed to blend seamlessly with the surrounding landscaped gardens and tranquil lakes, providing a comfortable, home-away-from-home experience for visitors while maintaining the durability required for a high-turnover rental environment.

600M2 GYM FACILITY

LEONORA MINESITE

The ***600m²*** mine site gym facility stands as a benchmark for rapid, high-performance construction in extreme environments, having been fully completed in just 30 days. Utilizing our specialized insulated panel system, we were able to significantly compress the traditional construction timeline while delivering a structure specifically engineered for the harsh Australian climate.

A critical advantage of this build is the superior thermal performance of the panel system. With a high R-value insulation core, the facility was designed to maintain a stable, cool internal environment even when external temperatures exceeded 40°C. This thermal efficiency not only ensures a comfortable and safe training space for site personnel but also drastically reduces the long-term energy costs associated with cooling a large-scale facility in the desert heat.

WESTERN ANIMAL NUTRITION FEEDMILL PLANT

WILEY CONSTRUCTION

Fabrication of structural components including grid mesh and handrails – Erecting of 30% structural steel and 70% mechanical equipment. Project timeline 2021 to 2023. The project was lead by our management team on site implementing a structured construction method with structural hold points for mechanical install followed by a survey all to be documented by our QA/QC Manager. Building a derivable MDR package.

KARRATHA PORT WALER BEAMS & ANCHOR HEADS

CLOUGH / SAIPAM

Manufacturing 960 anchor heads and 160 Waler beams in a period of 3 months, project included all fabrication and weld tests, as well as blast and paint.

Our VALUES

COMPANY VALUES

SAFETY COMES FIRST

- Everything we do as a business starts with safety.
- Having the right resources for the job such as people / equipment
- Planning the work we undertake
- Managing the change that is introduced
- Reviewing the work to improve next time

RESPECT

- Our people are the key to our success
- Involve and listen to others, demand an inclusive work place
- Listen to our clients and seek feedback

QUALITY

- Endeavor to give the best value for money in terms of effort, skill and results.
- Develop a reputation for excellence
- Provide a positive environment to work to get the best out of people

INTEGRITY

- Be consistent in the delivery of our commitments.
- Be transparent with our short falls, demonstrate our learning from these challenges
- Continually train and develop our people to ensure we prepare for tomorrow

Certified System™ Quality ISO 9001

Certified System™ Quality ISO 14001

Certified System™ Quality ISO 45001

NWCR IS READY. WILL YOU JOIN US AS A PILLAR FOR CHANGE?

Please reach out to our fantastic team!
